

The various versions of LogiTerm

LogiTerm is compatible with Windows 95, 98, ME, NT, XP, and 2000

Freelance Version (\$300 CAN)

Bitext creation: one pair of documents at a time.

Conversion of bitexts to translation memory format: one bitext at a time.

Indexing:

- Limit of 50,000 terminology records for the Terminology database.
- Limit of 5,000 files or 2 million words for the Bitext database (whichever comes first).
- Limit of 20,000 documents or 4 million words for the Full-text database (whichever comes first).
- Filters covering Word, WordPerfect, HTML, Excel, PowerPoint, and PDF formats.

Freelance Plus Version (\$450 CAN)

Everything in the Freelance Version, plus linguistic functions.

Linguistic functions:

- Scan for terms: Limit of 600 kilobytes of deformatted text (approximately 100,000 words) and 50 documents at a time.
- Pretranslation (from English only): one file at a time. Limit of 150 kilobytes of deformatted text.

Corporate Version (network)

Price: \$3,500 CAN for the first workstation, plus \$450 CAN for each additional workstation (2 to 10 users), \$445 CAN (11 to 14 users); \$432 CAN (15 to 24 users), and so forth

Everything in the Freelance Plus Version, with more features and fewer limits.

- Networkable.
- No limit on indexing databases.
- Create several bitexts at a time.
- Limit on scan for terms: 6 megabytes of deformatted text (approximately 1 million words) and 50 documents at a time.
- Create job glossary.
- Pretranslate 20 documents at a time. Limit of 150 kilobytes of deformatted text per file.
- Filters covering dozens of document formats.

Web Version

Make LogiTerm available at your Internet or intranet site so your employees and subcontractors can work offsite and still consult your terminology, bitexts and archives that you publish.

Minimum Configuration

- Pentium 120 MHz
- 32 Mb RAM
- Free hard drive space, Freelance Version: 50 Mb
- Free hard drive space, Corporate Version: 25 Mb on the server and 25 Mb on each workstation
